

User Story 2.2: Edit previously answered questions

The system supports editing previously submitted responses.

However, all questions are dependent on predecessor questions/responses expect first few categories.

If the user edits the previously submitted answers, all subsequent answers will be discarded by the system.

The diagram illustrates the process of editing a previously submitted answer in a questionnaire. It consists of two screenshots connected by a red arrow.

Top Screenshot (Initial State):

- Category List:** A vertical sidebar on the left contains two categories: "Category A" and "Category B".
- Active Category:** "Category B" is selected and highlighted.
- Question 1:** A question box labeled "Question 1" is displayed with a checkmark icon, indicating it has been answered.
- Input Field:** Below the question is a text input field with the placeholder text "Enter...".
- Buttons:** An "Enter" button is located at the bottom right of the input field, and a "Submit" button is centered below the input field.
- Navigation:** A button labeled "Ask NDIS" with a left-pointing arrow is located in the top right corner.

Bottom Screenshot (After Editing):

- Category List:** The same sidebar is shown, but "Category A" is now selected and highlighted.
- Question 2 and Question 3:** Two new question boxes, "Question 2" and "Question 3", are displayed, each with a checkmark icon, indicating they have been answered.
- Input Field:** The text input field with the placeholder "Enter..." remains.
- Buttons:** The "Enter" button is still present at the bottom right of the input field. A new "Next" button is now centered below the input field.
- Navigation:** The "Ask NDIS" button remains in the top right corner.

Flow: A red arrow originates from the "Submit" button in the top screenshot and points down to the "Next" button in the bottom screenshot, indicating the transition after editing a previously submitted answer.
